## End of Life product or scrap disposal

To whom so ever concern,

Bharat Bijlee limited encourages environment friendly practices , hence its subcontractors are requested to properly dispose/recycle end-of-life products in accordance to central, state, and local regulations.

Disposal can be carried out in a manner of ways depending upon material of the product. Below are the recommended methods of disposal of various materials. During disposal of the product, it is always necessary to act in accordance with local legal requirements in force.

Raw material	Recommended method of disposal
Metal material (Fe Cu, Al, Etc)	Separation and recycling
Thermoplasts ( plastics)	Recycling or disposal
Epoxy resin	Separation of metal and disposal remains
Rubber	Disposal
Oil	Draining and recycling or proper disposal
Packing material	Recycling or disposal
