## Service and Maintenance Products

### 2-26

Blended multipurpose lubricant for improving and extending operational life of electrical and electronic equipment.

### LECTRA CLEAN

Heavy duty contact cleaner and degreaser for motors and generators.

### ACRYFORM

Conformal coating for long term corrosion prevention of PCB assemblies.

## DC> 2-26

Blended multipurpose lubricant for improving and extending operational life of all electrical and electronic equipment.

- Prevents electrical failures caused by moisture and corrosion
- Displaces water and moisture from surfaces, pores and crevices
- Stops electrical leakage, arcing, short circuits, tracking and flash-overs
- Lubricates moving parts, contacts etc.
- Restores resistance values thereby eliminating time consuming heating and drying procedures for restoration of Electrical properties
- Contains no CFC

### APPLICATION

#### Electrical:

General purpose cleaning, lubricating and corrosion prevention of electrical and electronic equipment such as relays, terminal studs, CT boxes, contacts, control panels, battery terminals etc.

#### Mechanical:

General purpose cleaning, lubrication and corrosion prevention of ball/roller bearings, rusted mechanisms, hinges, sliding doors, automobile parts etc.

### TECHNICAL DATA

Flash Point .....30°C min.  
Heat Resistance .....150°C  
Specific Gravity .....0.80  
Dielectric Strength ..... 16 kV  
Film thickness.....0.75 to 2.0 Microns

## DC> LECTRACLEAN

Heavy-duty contact cleaner and degreaser for motors and generators.

- Removes oils and grease from electrical and mechanical equipment
- Also removes wax, dirt, moisture and other heavy soiling
- Evaporates and leaves surface clean and dry without any residues
- Penetrates into inaccessible areas and cracks, removing contamination & moisture
- Improves the performance and prolongs the lifetime of the equipment
- Contains no CFC

### APPLICATION

#### Electrical:

Degreasing and cleaning of electrical equipment such as motors, generators, circuit breakers, air conditioners and compressors, etc.

#### Mechanical:

Degreasing and cleaning of mechanical equipment such as chains, wire ropes, mechanical brakes and clutches, etc.

### TECHNICAL DATA

Flash point ..... none  
Dielectric strength.....28 kV  
Dielectric constant.....7.2 at 103 Hz  
Resistivity.....14.5x10<sup>9</sup> Ohm-cm  
Specific gravity .....1.6

## DC> ACRYFORM

Conformal coating for long term corrosion prevention of PCB assemblies.

- Forms a transparent, protective coating
- Protects PCBs from humidity and corrosion
- Protects PCBs from fungus, corrosive vapours and pollution
- Protects PCBs from tracking, dirt and dust
- Permits soldering or de-soldering directly through the coating
- Contains no CFC

### APPLICATION

#### Electrical:

For protection of PCB assemblies, wires, cables, battery terminals, terminal strips, switch boxes, marine radio components, telecom equipment etc.

#### Mechanical:

For protection of corrosion prone metallic surfaces exposed to adverse environmental conditions.

### TECHNICAL DATA

Specific Gravity..... 1.1  
Temp. Resistance.....-70°C to 120°C  
Drying time..... 30 minutes  
Curing Method..... Air drying  
Dielectric Strength.....20.4 kV

Manufactured by: Danmet Chemicals Pvt. Ltd.
