PRODUCT RELEASES

Our new series of Smoke Extraction motors are engineered for critical fire safety applications, designed to operate at temperatures up to 300°C, and are BS EN 12101-3:2015 certified. They are ideal for smoke and heat control ventilation systems, which create a smoke-free layer for safe evacuation.

Our Closed Air Circuit Air-Cooled (CACA, IC611) medium-voltage motors feature a robust, enclosed cooling system, ensuring optimal performance even in heavy-duty applications and demanding environments. These motors have excelled in third-party inspections, and the batch pictured here was delivered to Madhya Pradesh Jal Nigam (MPJN).

NEWS & EVENTS

We won the Best Performance Award for Quality and Delivery for 2023 and 2024 from our Daman-based customer, Allweiler India Pvt. Ltd. Allweiler is a leading manufacturer in the screw pump industry, and a subsidiary of CIRCOR India. Dharmendra Kumar Sinha and Saurabhkumar Gupta, from our Western Region sales team, accepted the award at the CIRCOR Supplier Conference 2025.

We're now at Vadodara! Our new office situated in the prime Sarabhai Park is close to the airport and railway station, enabling us to be better connected to our customers and partners. The office was inaugurated by our Sunil Mistry, along with Dharmendra Kumar Sinha, Nirav Desai, our South Gujarat team, and Channel Partners from the region.

We partnered with the Indian Plastics Institute (IPI) to host knowledge-sharing seminars on energy-efficient solutions for plastic machinery. Held in Chennai and Ahmedabad so far, these sessions are planned to extend to other cities. Our SynchroTorq® range of PM Servo Motors and KEB Drives received significant interest from participants.

We were recently featured in two industry magazines - Modern Plastics India (pg. 12 & 14 of the [August 2025 issue](#)) and Industry Outlook ([July 2025 issue](#)).

The Modern Plastics article highlights our partnership with KEB Automation, and explores how our automation solutions are helping plastic OEMs boost productivity, improve precision, and reduce operational costs. The article in Industry Outlook showcases our capability to deliver customized high-performance solutions, backed by reliable localised service to fulfil the needs of customers in India.
